# End-node Matter with Wi-Fi® Development Platform

END-NODE-MATTER-WI-FI

Last Updated: Feb 19, 2023

NXP's Matter with Wi-Fi Development Platform includes the hardware, software and enablement needed to create a standalone Matter device using the MW320 wireless MCU. Leveraging the RDMW320-R0 development board, customers can use the Matter software found at the GitHub here: https://github.com/project-chip/connectedhomeip

End-node Matter with Wi-Fi Development Platform Block Diagram

MW320

SE05x or A5000

NXP Technology   Optional   Note: Use of a Secure Element like the SE05x and A5000 is optional for Matter implementations
