

# NTAG I<sup>2</sup>C Plus 2K: NFC Forum Type 2 Tag with I<sup>2</sup>C Interface

## NTAG\_I2C

Last Updated: Apr 11, 2024

Please check the new online [NFC Antenna Tool](#) for tag and reader devices.

The NTAG I<sup>2</sup>C plus combines a passive NFC interface with a contact I<sup>2</sup>C interface. Designed to be an enabler for NFC in home-automation and consumer applications, this connected NFC tag is a fast, cost effective way to add tap-and-go connectivity to just about any electronic device.

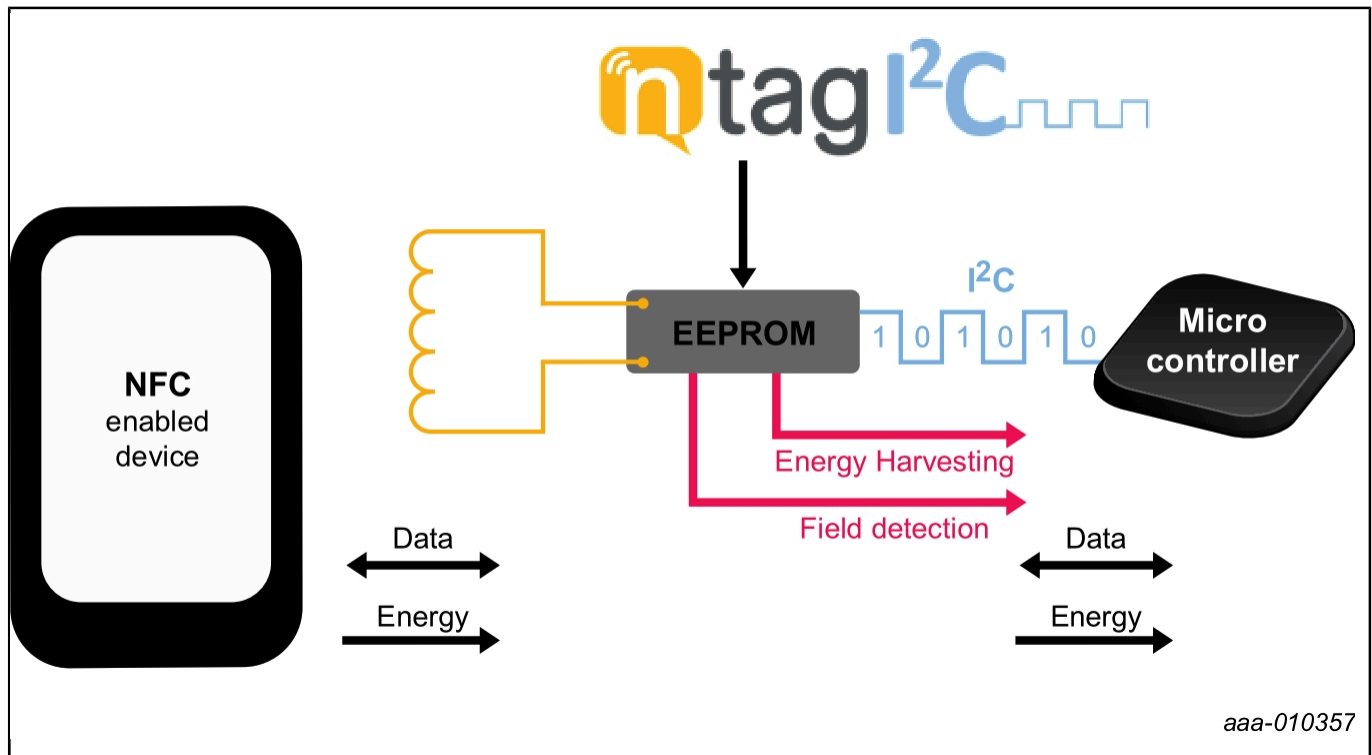

These devices maintain full backward compatibility with first-generation NTAG I<sup>2</sup>C while adding advanced features for password protection, a full memory-access configuration from both interfaces, and an originality signature for protection against cloning.

### Commitment to Longevity

NT3H2211 and NT3H2111 are ready to support your development today, tomorrow and beyond through its longevity program. The Product Longevity program ensures a stable supply of products for your embedded designs
